HOSPITALS AND MEDICAL CARE

MENTE A MELHORIA

## FOREWORD

Hospital Care In Alberta is a statistical supplement to the Department of Hospitals and Medical Care's Annual Report for the fiscal year ended March 31, 1979. It provides detailed information on the operation and utilization of general hospitals, auxiliary hospitals and nursing homes in Alberta.

Most of the tables which follow cover the reporting period April 1, 1978 to March 31, 1979. The exceptions to this are the hospital morbidity tables which are prepared for the calendar year 1978. In the interpretation of tables, reference should be made to the glossary and to any footnotes appearing at the end of each table.

The information presented in this publication is that reported to the Department by individual hospitals and nursing homes. Inquiries pertaining to this publication or requests for additional information should be addressed to:

Institutional Reporting Unit,  
Management Information Development Branch,  
Alberta Hospitals and Medical Care,  
Box 2222,  
10035-108 Street,  
Edmonton, Alberta,  
T5J 2P4.

I would like to acknowledge the effort shown by the staff of my Department, particularly the Health Economics and Statistics Branch, in preparing this statistical supplement.

G. J. CHATFIELD  
Deputy Minister  
Hospitals and Medical Care

## HIGHLIGHTS

### PUBLIC AND FEDERAL GENERAL HOSPITALS

- As at March 31, 1979, there were 124 public and federal general hospitals in Alberta providing in-patient services to residents of the province. In addition, there were three federal nursing stations and one general hospital which provided ambulatory care services only.
- During 1978-79, the number of approved adult and children beds in general hospitals decreased by 26, from 12,390 beds at March 31, 1978 to 12,364 beds at March 31, 1979. The approved bed complement of these facilities as at March 31, 1979 provided a ratio of 6.2 hospital beds per 1,000 population, down slightly from 6.4 beds per 1,000 population as at March 31, 1978. Average percentage occupancy during the year was 69.3%.
- General hospitals reported 375,376 adult and children separations in 1978-79, with an average length of stay of 8.4 days. The average daily number of in-patients present in general hospitals during the year was 8,572.0.
- In 1978-79, the total number of standard units performed by laboratories in general hospitals was 159,371,009. Of this total, 54.3% were for in-patients, 17.3% were for out-patients, 8.0% were referred-in for persons who were neither in-patients nor out-patients of the reporting hospital and for public health reasons, and 20.4% were for routine health examinations for hospital staff, environmental control programs, quality control, calibration standards and research programs.
- The total number of diagnostic radiology examinations performed on in-patients, out-patients and hospital staff by general hospitals and outside agencies during the year was 1,097,140. Of these examinations, 39.5% were for in-patients and the remaining 60.5% were for out-patients and hospital staff.
- Total paid hours per patient-day for full-time and part-time persons employed in general hospitals, excluding medical staff, interns and residents, was 15.4 in 1978-79.
- Total operating expense per patient-day for public general hospitals was \$169.30 in 1978-79 while per capita operating expense for these facilities was \$252.73.

### AUXILIARY HOSPITALS

- There were 31 auxiliary hospitals in the province as at March 31, 1979. The approved bed complement of these hospitals was 3,085 representing 1.5 beds per 1,000 population. Average percentage occupancy of these facilities was 92.3% in 1978-79.
- Total paid hours per patient-day for full-time and part-time persons employed in auxiliary hospitals was 5.7 in 1978-79.
- Total operating expense per patient-day for auxiliary hospitals was \$55.57 in 1978-79. Per capita operating expense was \$29.24.

### NURSING HOMES

- As at March 31, 1979, there were 77 nursing homes in the province with a total capacity of 7,025 beds. This provided a ratio of 47.3 beds per 1,000 population 65 years of age and over.
- Average percentage occupancy of nursing home beds during 1978-79 was 99.2% (excludes the Veterans' Home in Edmonton).
- Patients still-in nursing homes as at March 31, 1979 had an average length of stay of approximately 3½ years.

(1) Based on Statistics Canada's Quarterly Estimates of Population for Canada and Provinces as at April 1, 1979.

(2) Excludes the Veterans' Home in Edmonton.

(3) Average length of stay of patients still-in nursing homes as at March 31, 1979.

## GENERAL NOTES

The statistics presented in this publication have been compiled from information submitted to the Department of Hospitals and Medical Care by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, as shown in Tables 1 to 33, have been derived from the Annual Return of Health Care Facilities - Hospitals - Part One for the year ended March 31, 1979. The data include all amendments and corrections submitted to the Department by individual hospitals on or before May 10, 1980. The financial data presented in Tables 30 to 33 are unaudited and are compiled on an accrual basis. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

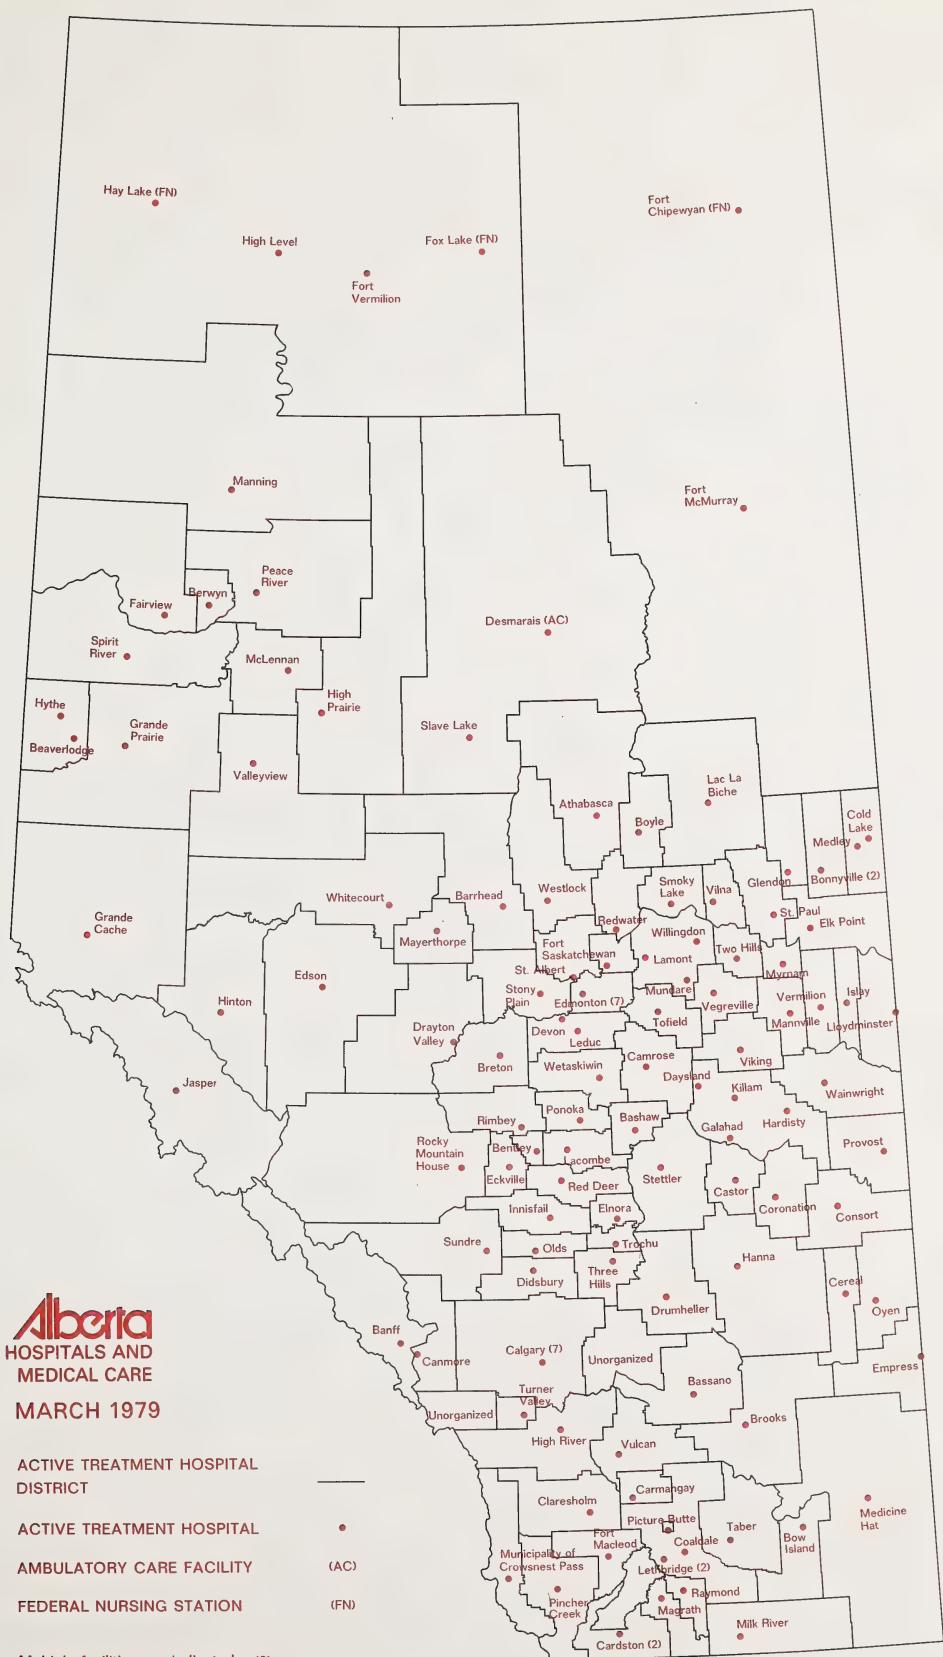

Tables 34 to 44, which present hospital morbidity data, have been compiled from hospital in-patient separation records for the calendar year 1978. The tables include data for both residents and non-residents of Alberta who were separated from Public and Federal General Hospitals in Alberta, as well as for Alberta residents who were separated from the Lloydminster Hospital in Saskatchewan, during the period January 1 to December 31, 1978. The tables exclude data on Alberta residents who were hospitalized in all other General Hospitals outside of the province.

Nursing home operation and patient data, as shown in Tables 45 to 55, have been derived mainly from nursing home claims payment statistics for the fiscal year 1978-79. The exceptions to this are Tables 46 and 47 which were obtained from the Alberta Nursing Home Plan, Monthly Information Report for the year ended March 31, 1979.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In Tables 1, 3 to 33 and 45 to 55, the facilities have been arranged in ascending order on approved bed complement. An alphabetical listing for each type of facility can be found at the end of the supplement.

**Note:** All rates shown in the following tables have been truncated, with the exception of average percentage occupancy of nursing homes in Table 45.

## NOTES:

(1) SOURCE: ALBERTA MORBIDITY FILE, 1978. INCLUDES BOTH RESIDENTS AND NON-RESIDENTS OF ALBERTA WHO WERE SEPARATED FROM GENERAL HOSPITALS IN ALBERTA, AS WELL AS ALBERTA RESIDENTS WHO WERE SEPARATED FROM THE LLOYDMINSTER HOSPITAL IN SASKATCHEWAN. RESIDENTS WHO WERE HOSPITALIZED IN OTHER GENERAL HOSPITALS OUTSIDE OF THE PROVINCE.

(2) A SEPARATION IS THE DISCHARGE OR DEATH OF AN IN-PATIENT.

(3) PRIMARY DIAGNOSIS IS THE CONDITION ESTABLISHED, AFTER STUDY, TO BE CHIEFLY RESPONSIBLE FOR OCCASIONING THE ADMISSION OF THE PATIENT TO THE HOSPITAL FOR CARE.

TABLE 35 - TWENTY LEADING CAUSES OF HOSPITALIZATION

## NOTES:

(1) SOURCE: ALBERTA MORBIDITY FILE, 1978. INCLUDES BOTH RESIDENTS AND NON-RESIDENTS OF ALBERTA WHO WERE  
SEPARATED FROM GENERAL HOSPITALS IN ALBERTA AS WELL AS ALBERTA RESIDENTS WHO WERE SEPARATED FROM THE  
LLOYDMINSTER HOSPITAL IN SASKATCHEWAN. EXCLUDES ALBERTA RESIDENTS WHO WERE HOSPITALIZED IN OTHER  
GENERAL HOSPITALS OUTSIDE OF THE PROVINCE.

(2) A SEPARATION IS THE DISCHARGE OR DEATH OF AN IN-PATIENT. INCLUDES ADULT AND CHILDREN SEPARATIONS ONLY.  
EXCLUDES NEWBORN SEPARATIONS.

(3) PRIMARY DIAGNOSIS IS THE CONDITION ESTABLISHED AFTER STUDY, TO BE CHIEFLY RESPONSIBLE FOR OCCASIONING  
THE ADMISSION OF THE PATIENT TO THE HOSPITAL FOR CARE.

## NOTES:

(1) SOURCE: ALBERTA MORBIDITY FILE 1978. INCLUDES BOTH RESIDENTS AND NON-RESIDENTS OF ALBERTA WHO WERE SEPARATED FROM GENERAL HOSPITALS IN ALBERTA, AS WELL AS ALBERTA RESIDENTS WHO WERE SEPARATED FROM THE LLOYDMINSTER HOSPITAL IN SASKATCHEWAN. EXCLUDES ALBERTA RESIDENTS WHO WERE HOSPITALIZED IN OTHER GENERAL HOSPITALS OUTSIDE OF THE PROVINCE.

(2) A SEPARATION IS THE DISCHARGE OR DEATH OF AN IN-PATIENT.

(3) PRIMARY OPERATION IS THE MOST IMPORTANT OPERATIVE PROCEDURE, REGARDLESS OF WHETHER IT WAS THE FIRST PROCEDURE DONE. THE MOST IMPORTANT OPERATION IS THE ONE THAT INVOLVES THE GREATEST SURGICAL RISK TO THE PATIENT. NON-SURGICAL PROCEDURES ARE THOSE PERFORMED FOR DIAGNOSTIC OR THERAPEUTIC PURPOSES.

## **GLOSSARY**

## GLOSSARY

**ADULTS AND CHILDREN:**

All in-patients, except newborn.

**APPROVED BED COMPLEMENT:**

(For Public and Federal General Hospitals)  
The number of beds approved for the hospital by the Department of Hospitals and Medical Care and the Federal Government, respectively.

**AUXILIARY HOSPITAL:**

A hospital designed and operated for persons who require elements of hospital care at a less intensive level than is provided in general hospitals. The patients are usually chronically ill or disabled. For some, treatment consists of rehabilitation to a point that return to the community or transfer to a nursing home or other residential facility is possible. For others, treatment is the provision of necessary skilled nursing and medical care for an extended period of time, even though there is little prospect of rehabilitation.

**AVERAGE DAILY NUMBER OF PATIENTS:**

The average number of in-patients during any given period of time. It is calculated by dividing the number of patient-days (other than newborn) during the period, by the number of days in the period.

**AVERAGE LENGTH OF STAY:**

The average number of days stay of in-patients who were separated from the facility during the reporting year. It is calculated by dividing the total days stay by the number of separations during the reporting year.

**AVERAGE PERCENTAGE OCCUPANCY:**

The ratio of actual days of care to the maximum days of care for the reporting year, expressed as a percentage. It is computed by dividing the total patient-days during the reporting year by the total bed days in the same year (approved bed complement at March 31, 1979 times the number of days in the year) and multiplying by 100.

**BEDS STAFFED AND IN OPERATION:**

The number of beds, as at the end of the reporting year, that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

**DEATH:**

The cessation of life of an in-patient after admission and before discharge. This category excludes stillbirths.

**DIAGNOSTIC RADIOLOGY EXAMINATION:**

An examination is defined as a single diagnostic procedure performed during one attendance of the patient, making use of any of the following:

- a) Fluoroscopy or examination by image intensifier,
- b) Production of one or more exposed films,
- c) An integrated combination of a) and b),
- d) Procedures using other equipment, (e.g. E.C.G., etc.) when done by the staff of the radiology unit.

**DISCHARGE:**

The official departure from the hospital or from a provincially-recognized unit of the hospital of a live in-patient. Discharge of a newborn is deemed to occur at the time of official release from the hospital.

**ELECTROCARDIOGRAPHY (E.C.G.):**

The unit specifically designed, staffed and equipped to measure and record electrical impulses of the heart for the evaluation of heart function.

**ELECTROENCEPHALOGRAPHY (E.E.G.):**

The unit specifically designed, staffed and equipped to measure and record electrical impulses of the brain for the evaluation of brain function.

**EMERGENCY UNIT:**

The unit whose primary concern is the provision of medical and surgical services for the treatment of injury, shock, or other conditions requiring immediate care. The service areas may include dressing rooms, examination rooms and operating rooms (which, in turn, may include fracture, cystoscopy and recovery rooms).

**FEDERAL HOSPITAL:**

A hospital owned and/or operated by a department or agency of the Government of Canada and operated on a non-profit basis. Operation will generally be by one of the following agencies: Veterans' Affairs, Health and Welfare Canada, National Defence and Atomic Energy of Canada.

**FULL-TIME EQUIVALENT:**

One full-time equivalent person is equal to total accumulated paid hours divided by normal hours of one full-time employee (2,022.75 hours).

**GENERAL HOSPITAL:**

A hospital which provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries. The services of a general hospital are not restricted to a specific age group or sex.

**IN HOSPITAL AT BEGINNING OF THE YEAR:**

Is the count of all in-patients who were assigned a hospital bed or bassinet as at 12:01 a.m. on the first day of the reporting year. Includes any in-patient who was temporarily visiting out of hospital on this date, but who had not been discharged.

**IN HOSPITAL AT END OF THE YEAR:**

Is the count of all in-patients registered in the hospital at 12:00 p.m. on the last day of the reporting year and includes patients temporarily out of hospital but who have not been discharged.

**IN-PATIENT:**

Is a person who has been admitted to a hospital for medical and hospital services and who has been assigned an in-patient bed, or bassinet. This category excludes stillbirths, as well as patients attending a day or night care unit.

**IN-PATIENT ADMISSION:**

Is the official acceptance into a hospital of a patient (including an infant born alive in the hospital) who requires medical and hospital services including room and board. Reception involves the allocation of a hospital bed, bassinet or an incubator to the patient. A person is counted as an admission each time he is formally admitted to the hospital or to a provincially-recognized unit within the hospital.

**INSURED RESIDENTS:**

Is the total number of Alberta residents eligible for benefits under the Alberta Health Care Insurance Plan and the Alberta Hospitalization Benefits Plan.

**LABORATORY:**

The unit specifically designed, staffed and equipped for performing laboratory investigative procedures through detailed analysis, assay and examination of specimens. This may include microbiology, hematology, histopathology (including autopsy), cytopathology, blood bank and morgue. Electrocardiography and electroencephalography, medical illustration and nuclear medicine are also sometimes part of the Laboratory.

**LABORATORY STANDARD UNIT:**

A measure of the workload of a laboratory. One unit is equivalent to one productive minute of technical, clerical and aide time.

Instructions for recording units during the year can be found in the current edition of the "Canadian Schedule of Unit Values for Clinical Laboratory Procedures".

**LABORATORY TEST:**

Is defined as an activity leading to a result which is reported.

**LONG-TERM UNIT:**

An in-patient unit provided for patients who, at the time of admission, require regular medical assessment, treatment services and continuing nursing care.

**MATERNAL DEATH:**

A death in which a complication of pregnancy, childbirth, or of the puerperium was the cause of, or gave rise to a condition which caused the death. Deaths resulting from abortions are also classified as maternal deaths. A maternal death is not necessarily related to an obstetrical patient who has been delivered. The death of an obstetrical patient, before or after delivery, is counted as a maternal death. Likewise the death in the hospital of a woman following an abortion is counted as a maternal death.

**MOTHERS DELIVERED:**

The number of mothers who were delivered of a single livebirth or stillbirth, or multiple livebirths or stillbirths, or a combination of these, resulting from one pregnancy. Multiple births are counted as one delivery. Excluded are those deliveries which take place prior to admission.

**NEWBORN:**

An infant born alive in the hospital, or admitted when the mother was admitted for maternity service, is defined as a newborn for the period of his continuous stay in the hospital. (Transfer within the hospital from the newborn nursery is not considered a separation).

**NEWBORN ADMISSION:**

Admission of a newborn is deemed to occur at the time of birth or subsequently at the time of admission of the mother for maternity services.

**NEWBORN DEATH:**

The death of a newborn admission in hospital on or before the seventh day of stay.

**NUCLEAR MEDICINE:**

The unit specifically designed, staffed and equipped for the control and use of radioactive elements for diagnostic and/or therapeutic purposes.

**NURSERY:**

The unit concerned with direct nursing care of newborn infants including those in immature and suspect nurseries. Excludes the Obstetrical Suite.

**NURSING HOME:**

Provides supervised, personal care for persons who are not ill enough to require hospitalization in a general or auxiliary hospital, but require assistance in coping with activities of daily living.

**OBSTETRICAL SUITE:**

The unit specifically designed, staffed and equipped for the observation, preparation, care and delivery of parturient women. Includes delivery room(s) and labor room(s) of the hospital, but excludes the nursery.

**OUT-PATIENT:**

Is a patient who has been formally accepted by a hospital and who receives diagnostic and therapeutic services without being admitted as an in-patient. This category includes private out-patients as well as patients attending a day or night care unit.

**PATIENT ATTENDANCE:**

One patient attendance is counted for a patient even though he may:

- a) attend the Physical Medicine and Rehabilitation Unit and/or an in-patient unit more than once a day;
- b) be treated during a day in several areas of Physical Medicine and Rehabilitation by several staff members.

**PATIENT-DAY:**

The period of service to an in-patient between the census-taking hours on two successive days; the day of admission is counted as a patient-day, but the day of separation is not. When the patient is admitted and separated on the same day, one patient-day is counted.

**PATIENT-DAYS DURING THE YEAR:**

The total volume of in-patient care, expressed in patient-days, of the facility during the reporting year.

**PHYSICAL MEDICINE AND REHABILITATION UNIT:**

The unit responsible for the medical assessment and treatment of disabled patients to improve or maintain their functional capacity by accepted techniques of rehabilitation. Includes such services as Physiotherapy, Occupational Therapy, Prosthetics (including Brace-making), Speech Therapy and Audiology.

**PHYSIOTHERAPY AND/OR OCCUPATIONAL THERAPY WEIGHTED UNIT:**

A measure of the workload of the Physiotherapy and/or Occupational Therapy department. One unit is equivalent to five minutes of treatment received by a patient.

Instructions for recording units (weighted and time units) during the year can be found in the current edition of the "Canadian Schedule of Unit Values for Physiotherapy and Occupational Therapy".

**POSTNATAL NEWBORN ADMISSION:**

A count of infants born outside the hospital and who were admitted to the hospital, their mothers having been admitted for maternity services.

**PRIMARY DIAGNOSIS:**

The condition established, after study, to be chiefly responsible for occasioning the admission of the patient to the hospital for care.

**PRIMARY OPERATION AND/OR TREATMENT:**

Is the most important operative procedure, regardless of whether it was the first procedure done. The most important operation is the one that involves the greatest surgical risk to the patient. Non-surgical procedures are those performed for diagnostic or therapeutic purposes.

**PRIVATE ACCOMMODATION:**

Any room having one bed only.

**PUBLIC HOSPITAL:**

A hospital recognized by the province as a "public hospital". Such a hospital generally is not operated for profit.

**RADIOLOGY:**

The unit specifically designed, staffed and equipped for the use of radiant energy from X-ray equipment and radioactive elements for the diagnostic examination and treatment of patients.

- Diagnostic: the unit specifically designed, staffed and equipped for the use of radiant energy from X-ray equipment for diagnostic purposes.
- Therapeutic: the unit specifically designed, staffed and equipped for the use of radiant energy from X-ray equipment and radioactive elements for therapeutic purposes.

**SEMI-PRIVATE ACCOMMODATION:**

Any room having two beds.

**SEPARATION:**

Is the discharge or death of an in-patient.

**SHORT-TERM UNIT:**

An in-patient unit provided for patients who, at the time of admission, require diagnostic and therapeutic services and/or skilled nursing care and medical attention.

**STANDARD WARD ACCOMMODATION:**

Any room having three or more beds.

**STILLBIRTH:**

Is defined as the birth of a dead fetus of not less than 20 weeks gestation or not less than 500 grams in weight.

**SURGICAL DAY CARE PROGRAM:**

A recognized, organized out-patient program. A surgical day care patient is one who is not admitted as an in-patient to an in-patient bed, and on whom is performed an elective surgical or endoscopic procedure, under a local or general anaesthetic, and who is released on the same day.

The visits of surgical day care patients are also recorded as out-patient visits in the count of the appropriate unit where the procedures are performed, i.e., Surgical Suite or Emergency Unit.

**SURGICAL SUITE:**

(Including Post-operative Recovery Unit)  
The unit (other than an Emergency Unit) designed, staffed and equipped for the performance of surgical procedures and for the continuous observation and care of patients during the immediate post-operative or post-anaesthesia period. Includes fracture and cystoscopy rooms.

**THERAPEUTIC RADIOLOGY TREATMENT:**

The procedure in which there is an exposure, or series of exposures, of the patient to radiation during the course of a single attendance at the Radiology Unit. If more than one modality is involved during one visit, one treatment is counted for each modality.

**TOTAL ACCUMULATED PAID HOURS:**

Are reported separately for each department including those for all full-time, part-time and casual employees excluding medical staff of the hospital who, during the year, have had salaries or wages payable to them by the hospital. Hours covering paid holiday time and other paid leave are included for all categories of personnel.

**TOTAL DAYS STAY:**

The accumulated patient-days since admission, of patients separated during the reporting year, even if admitted in a previous year.

**TOTAL UNDER CARE DURING THE YEAR:**

Includes in-patients in hospital at beginning of the year plus all in-patient admissions during the year.

**ULTRASONOGRAPHY (DIAGNOSTIC):**

The examination of structures and organs of the body utilizing the techniques of ultrasound. These are waves of high intensity with a frequency above that of audible sounds, that is, above 20 kilocycles.

**VISIT:**

Is defined as one attendance of a patient, for a continuous period of time, during which operation(s), treatment(s), or examination(s) are performed.
